#### 1.3 Cloud Admin UI Overview

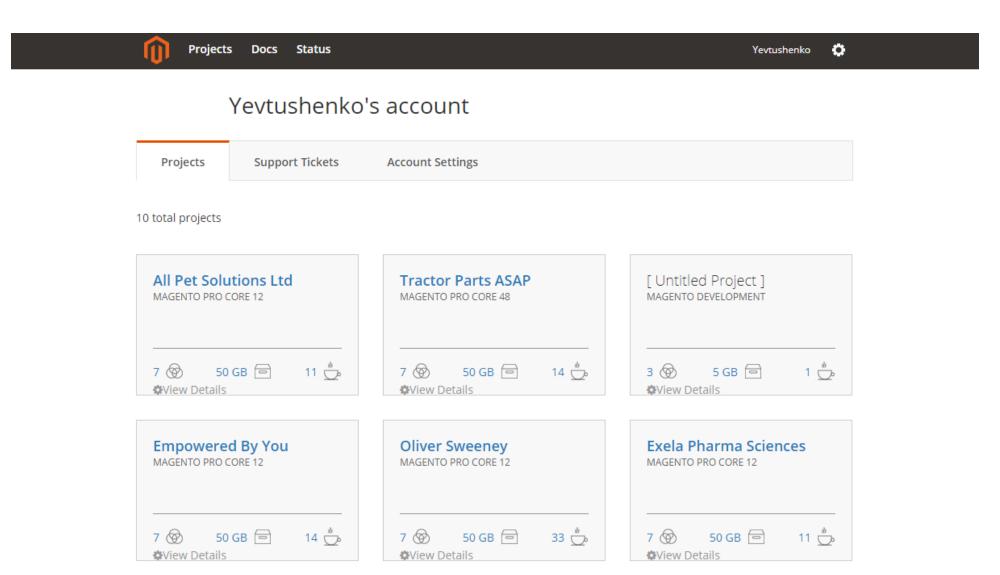

After this module a student will be able to:

- Locate project settings, users management and project variables pages
- Locate environments, access links and logs
- Locate environment settings

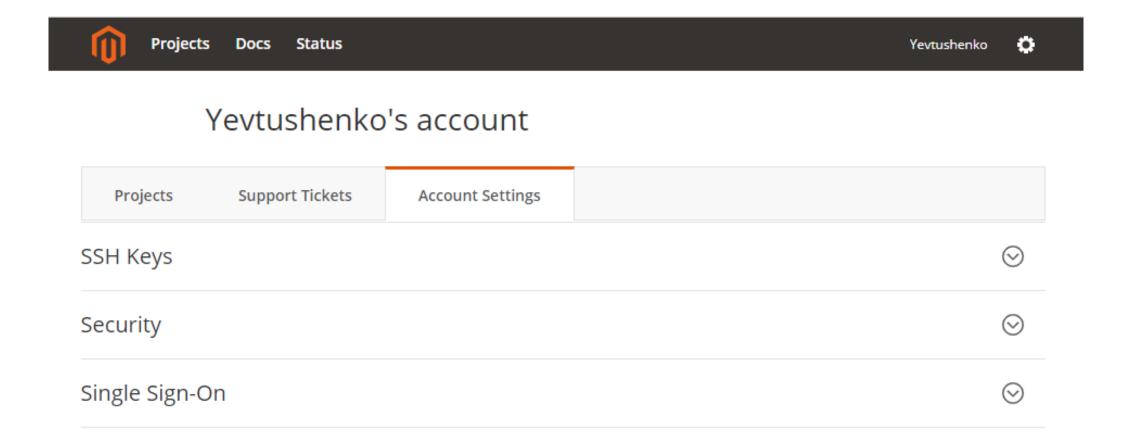

# https://accounts.magento.cloud

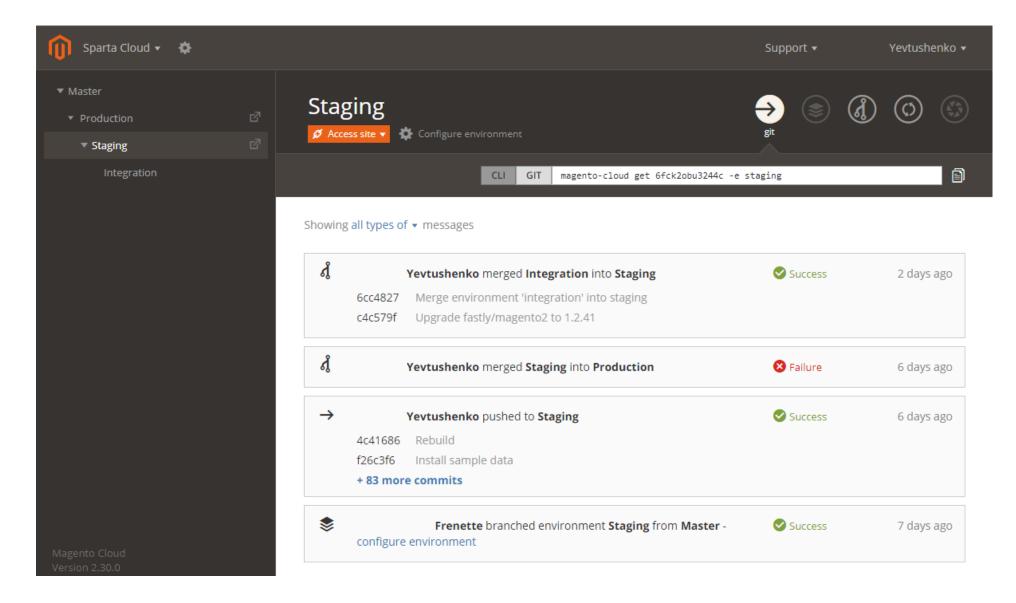

# Magento Cloud Admin UI Dashboard

# **Account Settings**

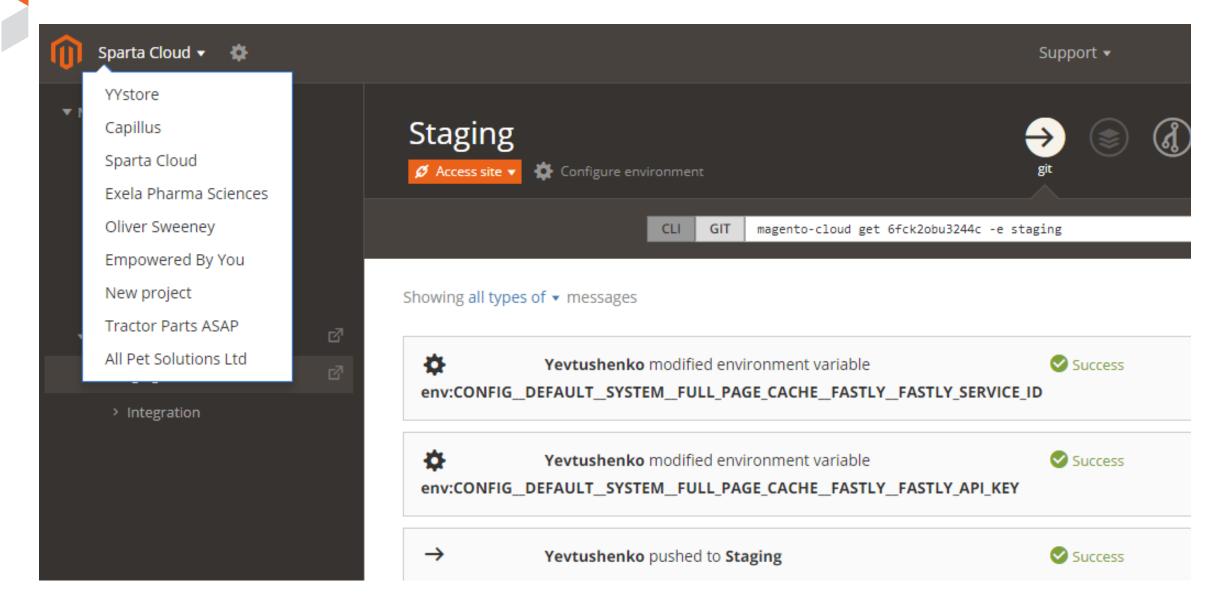

# Open a Project

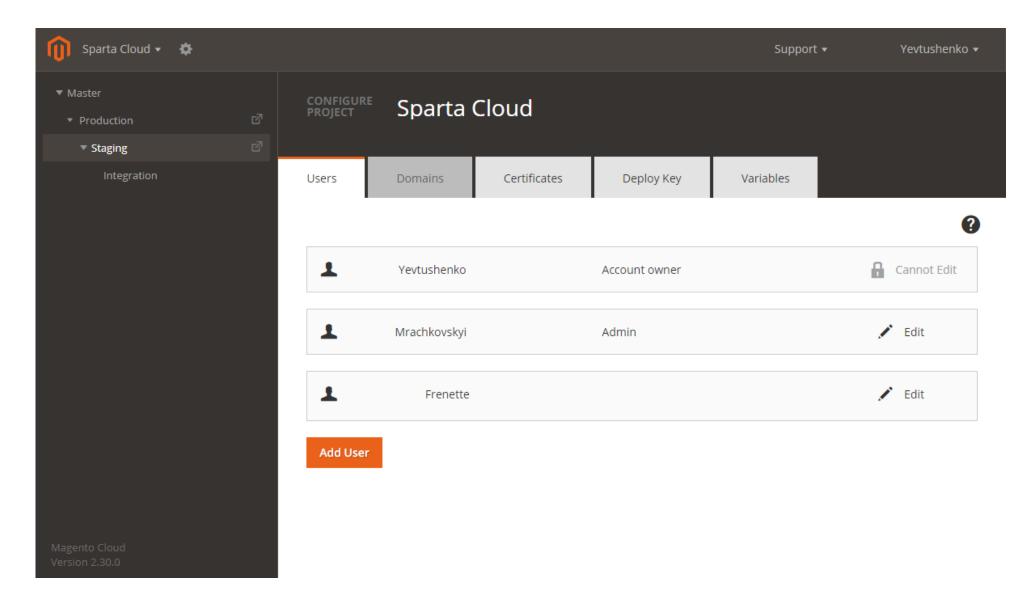

#### Web UI Elements

- 1. Project name and a projects switcher
- 2. Project configuration button
- 3. Support dropdown menu
- 4. Account dropdown menu
- 5. List of environments (git branches)
- 6. Environment control pane (branch, merge, sync, access)
- 7. Action log

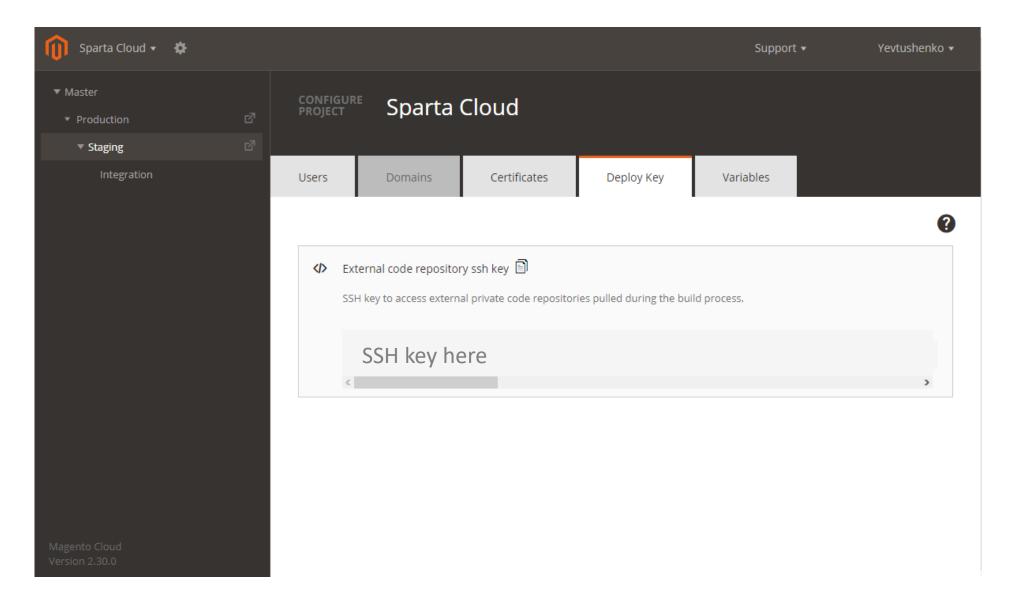

### Project Name and a Projects Switcher

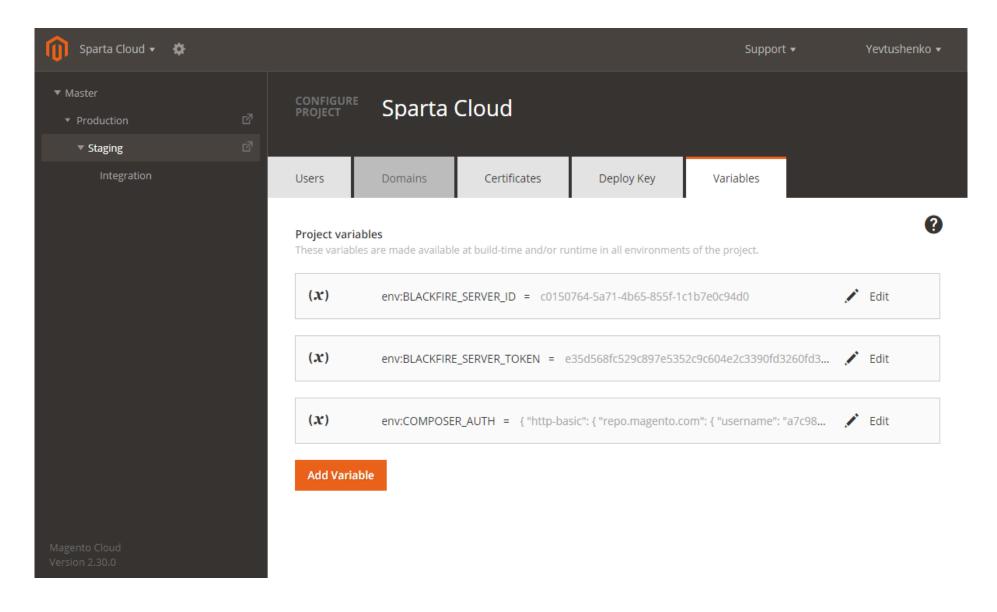

# Project Configuration: Users

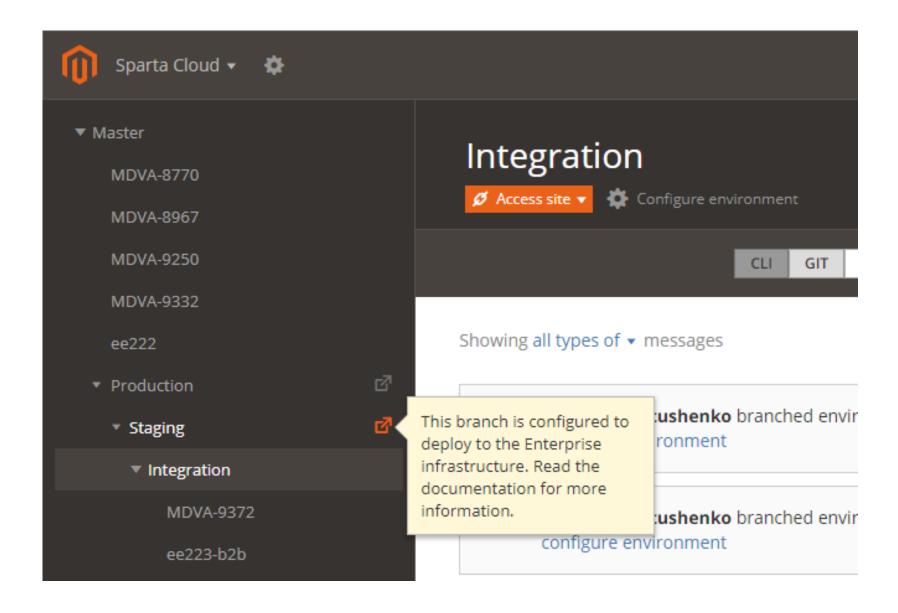

# Project Configuration: Deploy Key

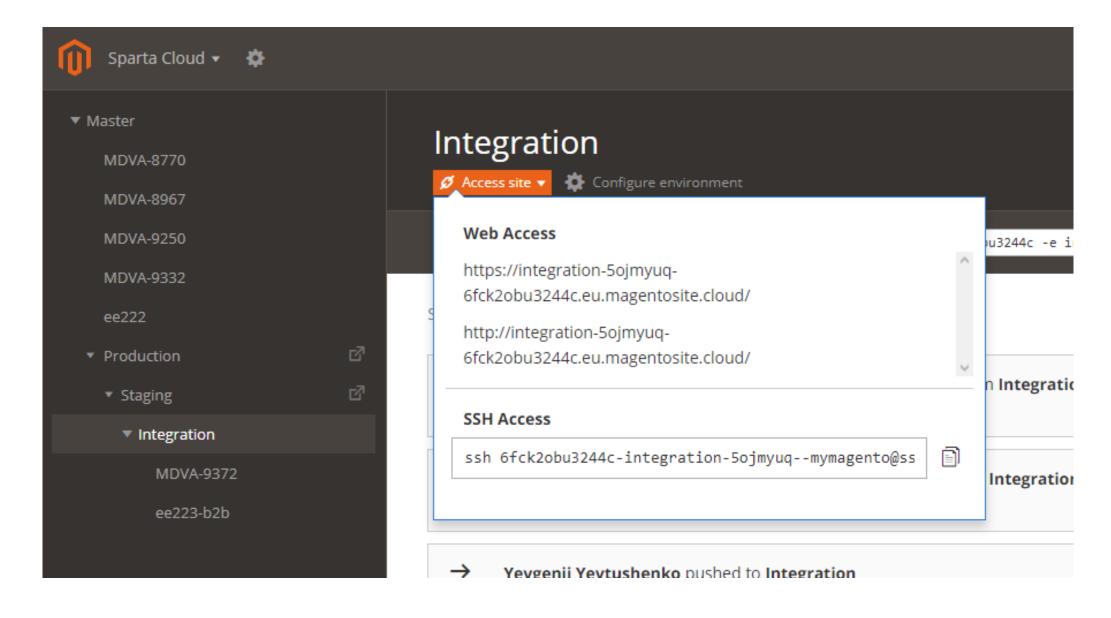

# Project Configuration: Variables

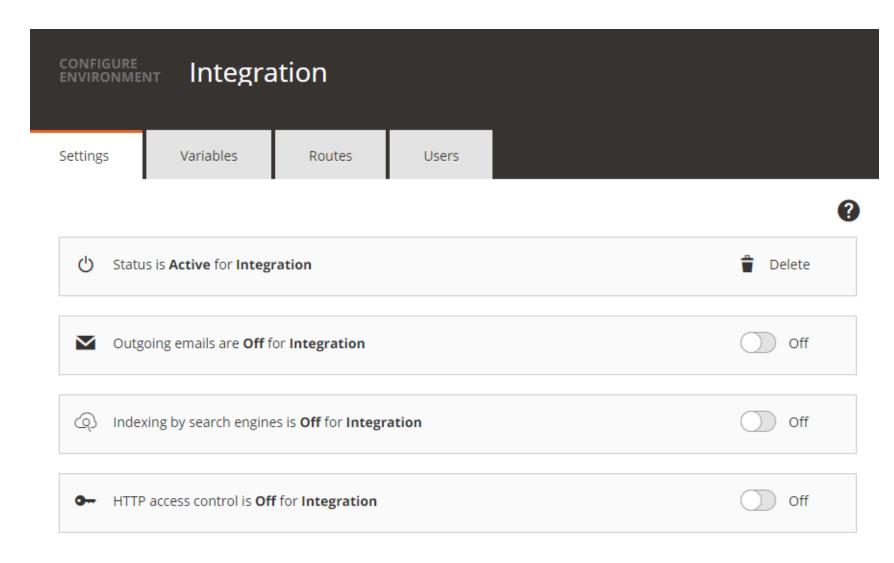

### List of Environments

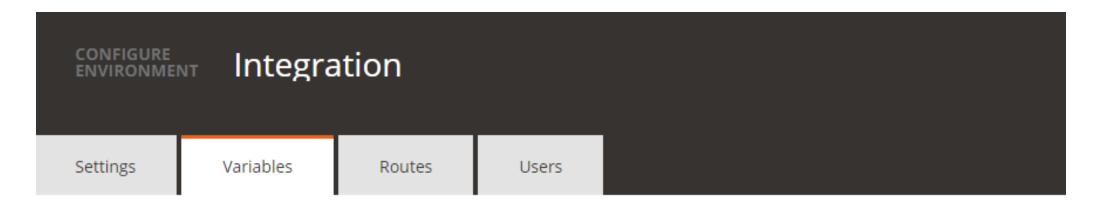

#### **Environment Control Pane: Access Site**

# Configure Environment: Settings

### Configure Environment: Variables

#### Environment-specific variables

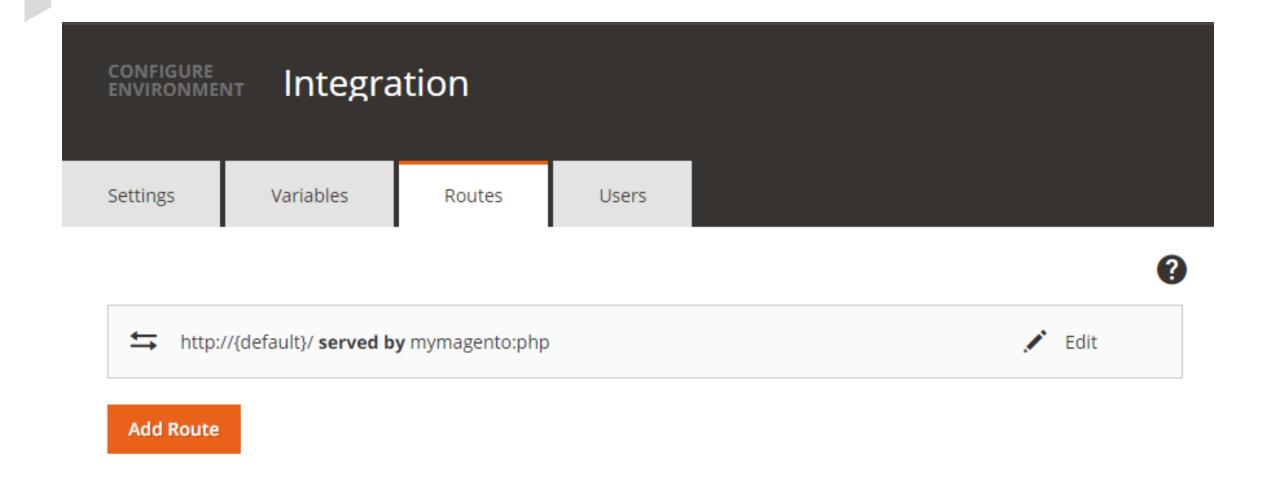

These variables will be available at runtime in this environment, and will be inherited by child environments.

(x) ADMIN\_EMAIL = example @magento.com (inherited) • View

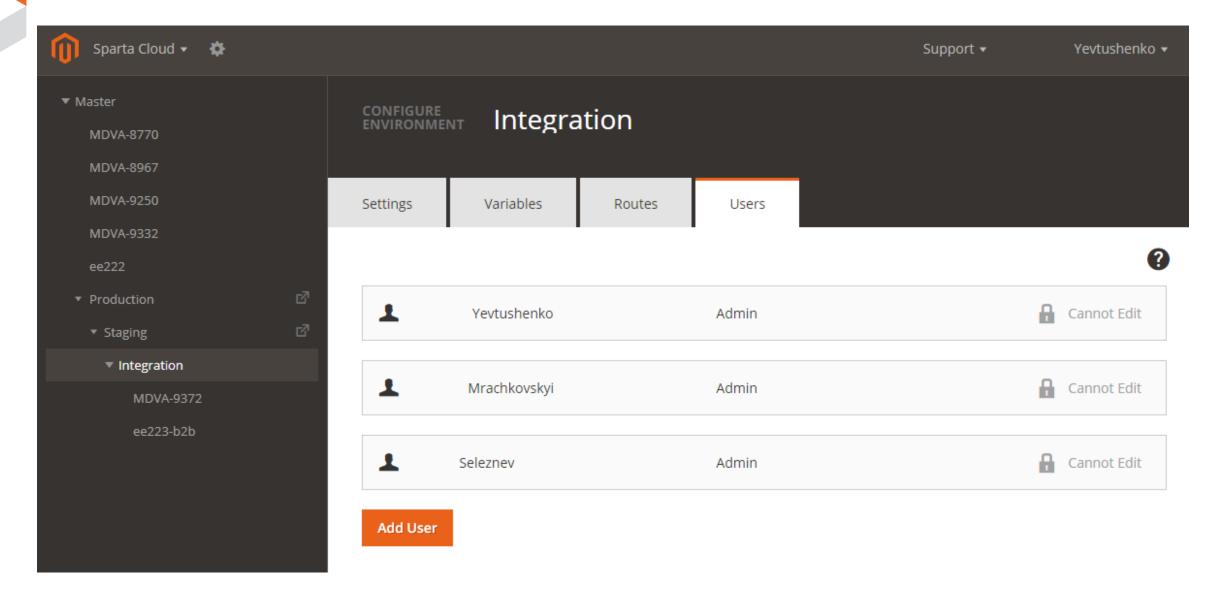

(x) env:CONFIG\_DEFAULT\_PAYPAL\_ON... = payment-broker.magento.com (inherited) ◆ View

(x) env:CONFIG\_\_DEFAULT\_\_SYSTEM\_\_FU... = 8797e9f4e2dbd6a10f27ec251221bda1 (in... ◆ View
